

NavipOS

Integrated Point-of-Sale System

NavipOS is an official Microsoft Navision Add-On Solution for any Point of Sale. In fact, NavipOS can be considered as the solution for any Point of Service: questions or customer issues are being dealt immediately at the sales counter.

The **analysis and development of NavipOS** has been done on the basis of 15 years of experience in the retail sector. As the solution was being developed, the following criteria have been of prime importance:

- Fast and efficient processing of cash sales
- Ease of use
- Restricted training requirements
- Support of various POS hardware (via OPOS) such as programmable keyboards, ticket printers, line displays, cash drawers, barcode scanners, scales, etc.

The strengths?

The integration of a cash sales solution into Microsoft Dynamics NAV has many advantages:

- No more imports from or exports to the cash register
- Accounting can be fully automated
- Unpaid balance is clearly visible at the cash register - refusal of blocked customers
- Automatic subtraction of prepaid deposits for orders, repairs, etc.
- Use of customer cards and discount options
- General information concerning (repair)orders, quotes and invoices is available at the cash register.

The essential

- Open the cash register and enter the starting amount.
- Easy registration of cash tickets at full speed
- Scan customer cards (if available) and register the ticket or provide an invoice at a glance
- End-of-day closure procedure resets the cash register automatically.
- A combined invoice is created automatically for each day cash sales to customers
- Print invoices similar to individual customer invoices for cash sales.

NaviPOS

Integrated Point-of-Sale System

Multiple options

- Design your own customer cards via [customer card support tool](#)
- [Scan new articles](#) regardless of your position (wireless)
- [Full integration](#) with all types of scale hardware
- Show [subtotal amounts](#) on ticket receipts
- [Print your offer in ticket format](#) or create a pro forma invoice (pre-invoicing)
- [Unlimited amount of orders](#) can be placed in a queue
- [Multiple payment methods options](#) per ticket i.e. Banksys terminal integration
- [Off line processing](#): continue order processing similar to online cash sales

The results

In terms of accounting you will definitely gain more time efficiency due to the high level of automation of the NaviPOS tool. The fast processing of data and easy use may lead to a decline in the number of cash registers in your store.

The full integration with Microsoft Office applications i.e. Excel can provide your company with useful statistic data regarding sales volume (per hour, per day,...) or even per sales person. This information can be used in strategic management decisions: how many employees do you need during peak periods etc.

About Microsoft Dynamics NAV

[Microsoft Dynamics NAV](#) is an integrated solution for company management for small to medium-sized companies. Almost 30,000 companies in more than 50 countries depend on Microsoft Dynamics NAV every day to manage their activities cost-effectively. Thus, with your mind at ease you can expand your company further with the help of Microsoft Dynamics NAV.

You decide yourself whether you replace your present system entirely or partially with the modules of Microsoft Dynamics NAV. You have a choice of various domains including financial management, production and distribution, management of customer relations and services (CRM), e-commerce and business analytics.

Your local **Microsoft Certified Partner** will adjust the software according to your specific needs. In this way, you only pay for what you need.

Microsoft Dynamics NAV brings together information from every corner of your company and lets you analyse it to make more profitable decisions. As part of the Microsoft family of offerings, these solutions are ready to work with widely-used productivity applications, like Microsoft Office, and top technologies like Microsoft Windows Server System and Microsoft .NET.

Data entered in one place is shared across your company - speeding operations, reducing errors, and putting accurate information at the fingertips of those who need it. But "connected" doesn't stop there. Processes can be securely extended to your entire business community, helping you maximise efficiency. Most importantly, these solutions are delivered by a global network of partners who provide local, personalised service - from planning and implementation, to customization, to ongoing support and education. That means you get world - class business solutions from a local professional who'll be there to provide what you need as business conditions change and your business grows
